Certain observations on the international application Box No. VIII

The following observations on the clarity of the claims, description, and drawings or on the question whether the claims are fully supported by the description, are made:

see separate sheet

#### Re Item V

1

Reasoned statement with regard to novelty, inventive step and industrial applicability; citations and explanations supporting such statement

Reference is made to the following document:

D1: US-A-5 148 002 (KUO DAVID D ET AL) 15 September 1992 (1992-09-15)

D2: US-B1-6 584 798 (SCHEGERIN ROBERT) 1 July 2003 (2003-07-01)

- 1 Claims 1 and 11 Novelty (Article 33(2) PCT)
- 1.1 The document D1 is regarded as being the closest prior art to the subject-matter of claims 1 and 11, and discloses (the references in parentheses applying to this document):

An autonomous garment (20) with active thermal control and powered by solar cells, comprising: solar cells, batteries (190), resistors (102), Peltier cells, micro-controller (130), electric bus connector (54), thermal sensors (208) and plugs (182, 186).

#### As well as

A method to produce such an autonomous garment (20).

- 1.2 The subject-matter of claims 1 and 11 therefore differs from this known garment in that it further comprises a refrigeration cycle and corresponding pipes.
- 1.3 The subject matter of claims 1 and 11 is therefore novel (article 33(2) PCT).
- 2. Claims 1- and 11 Inventive step (Article 33(3)-PGT)-- -- --
- 2.1 The problem to be solved by the present invention may be regarded as being to improve the cooling function of a garment with active thermal control.
- 2.2 The solution to the problem proposed in claims 1 and 11 of the present application is considered to involve an inventive step (Article 33(3) PCT), because although the use of miniaturized refrigeration units in garments is known (see for example D2), it is

neither known nor suggested in the available prior art to use such a unit in combination with resistance heating and Peltier cells in a single garment.

#### 3 Dependent Claims

Claims 2 - 10 are dependent on claim 1 and as such also meet the requirements of the PCT with respect to novelty and inventive step.

#### Re Item VIII

### Certain observations on the international application

The vague statement in the description on page 18 concerning portable electronic devices implies that the subject-matter for which protection is sought may be different to that defined by the claims, thereby resulting in lack of clarity (Article 6 PCT) when used to interpret them.
